

Collaboration Foundry

Making  SharePoint Work for You!

Your SharePoint implementation needs to support your people and business processes, not the other way around.

You need a smart combination of business and technology know-how that will maximize your SharePoint investment.

We at the Collaboration Foundry get it.

We understand how to bring the right balance to your project, ensuring its success.

On-Time. On-Budget. On-Target.

Business Process Acceleration

Your inefficient paper, e-mail and file sharing processes are costing you money.

We know how to accelerate your processes with SharePoint, providing real return on your technology investment.

Technology Leveraged

Your investment in technology must be successful. We bring SharePoint expertise to bear on your business challenges.

We know technology and the acronyms but we try to talk with you using normal words.

Organizational Empowerment

Your employees are smart. As experienced educators, we can empower them to succeed with SharePoint business processes.

We know how to build your organization's success through your people.
